Profile Summary

Full Stack MERN Developer (Fresher) with practical, project-based knowledge of MongoDB, Express.js, React.js, and Node.js. Built a frontend-focused video streaming web application using React.js, along with hands-on practice in REST API integration, Redux state management, and responsive UI design. Comfortable with Git/GitHub-based version control workflows and debugging real-world issues during development. A quick learner with strong problem-solving skills, seeking an entry-level MERN Stack Developer role to contribute to a product-focused team and grow technically.

- Frontend:** React.js, Redux, JavaScript (ES6+), HTML5, CSS3, Bootstrap
Backend: Node.js, Express.js
Database: MySQL, MongoDB
Version Control & Tools: Git, GitHub, Chrome Dev Tools
Other: API Integration, Netlify Deployment
Operating Systems: Windows, Linux (basic commands)

PROJECTS

SwapNest Product Exchange Marketplace | Live Demo [Link](#) | GitHub [Link](#) August 2026

- Tech Stack: React, JavaScript, Node.js, Express.js, MongoDB.
- Developed a full-stack product exchange marketplace using React.js, Node.js, Express.js, and MongoDB.
 - Implemented user authentication, allowing users to register, log in, and manage their accounts.
 - Developed features for users to list, upload, and manage products and browse products listed by other users.
 - Implemented an exchange request system enabling users to send and manage product exchange requests.
 - Built and integrated RESTful APIs for authentication, product management, and exchange operations.

Video Streaming Platform | Live Demo [Link](#) | GitHub [Link](#) June 2025

- Tech Stack: React.js, Redux, YouTube Data API, CSS.
- Built a YouTube-like web app with video listing, and responsive user interface.
 - Integrated YouTube Data API using Fetch API to retrieve and display dynamic video content.
 - Built dynamic UI with reusable components, reducing similar module development time by 40%.
 - Deployed on Netlify for public access and easy demonstration.

EDUCATION
